- Approved by Iranian MoH
- Wide spectrum of activity against Bacteria, yeasts and viruses
- No irritating vapors, Pleasant odor
- Strong simultaneous disinfection and cleaning effects
- Measuring compartment, efficient packaging

Measuring compartment  
"Easy dilution"

**Active ingredient:** Lauryl and myristyl dimethyl benzyl ammonium chloride  
**Direction for use:** Dr. BORNA disinfectant cleaner is a concentrated product and must be diluted before use. Add the right amount of concentrated solution to water, by applying the Measuring compartment of the package (2% dilute solution = 20 ml of product for each liter of water). Use clean mope or wipe and wet surfaces. Wait for drying.  
For best results on Bacteria, yeasts and viruses, at least 10 minutes contact time is recommended.

**Indications for use:** Dr. BORNA concentrated solution is used to disinfect, clean and also odorizing surfaces such as ceramic tiles, kitchen surfaces, toilets, bathrooms and corridors, "after dilution". This product can be used in home, public centers such as offices, banks, hotels, barracks, shopping centers, sport and health facilities, public areas of health care centers and etc.

**1 liter concentrated solution is equal to 50 liter diluted ready to use solution.**

- Keep the bottle vertically (doors closed)
- Tilt the bottle and pour the approximate amount of the concentrated solution into the measuring part.
- Choose the reverse direction to return to the main container, measure the exact amount of concentrated solution.
- Open the door of the measuring part and add the right volume to correct amount of water. Mix before use.
